

TROUP STATISTICAL SUMMARY

Overall Vulnerability per Theme	MMW Summary
<p>Overall COVID Vulnerability Spectrum (Based on 2 major studies)</p>  <p>Less Vulnerable More Vulnerable</p> <p style="text-align: center;">94.7</p>	<p>The three wards in the Banff and Buchan area are in the top three most vulnerable and Troup is ranked 2nd. There is some geographic access deprivation due to slightly longer drive times (car). All four Intermediate Zones (IZ) are in the 40% most vulnerable in terms of digital vulnerability with Macduff just outside the top 10%. The percentage of premises without superfast broadband is 22%. Socio-Economic vulnerability is the category that has a large impact on overall vulnerability.</p>
<p>Overall Age Vulnerability Spectrum (Based on 2 indicators)</p>  <p>Less Vulnerable More Vulnerable</p> <p style="text-align: center;">84.2</p>	<p>All IZs in this Ward are in the top 50% of IZs with a high percentage of residents aged 65+ relative to the total population. Gardenstown and King Edward has the highest percentage in the Ward at 23.9% dropping to 18.9% in Macduff. Rosehearty and Strathbeg is the only IZ that has a below average percentage (6.8%) of residents 65+ relative to Attendance Allowance cases with entitlement. This has to some extent increased the overall age vulnerability of the Ward.</p>
<p>Overall Health Vulnerability Spectrum (Based on 28 indicators)</p>  <p>Less Vulnerable More Vulnerable</p> <p style="text-align: center;">63.2</p>	<p>The Health vulnerability of the Ward is lower than the other vulnerabilities but still above the Aberdeenshire average. To put it into context in the Banff and Buchan Area it has a value of 63.2 (8th highest), Banff and District - 89.5 and Fraserburgh and District - 100. The most vulnerable IZ is Rosehearty and Strathbeg and the least vulnerable New Pitsligo. As of 31st July, there have been 3 COVID-19 deaths reported in Ward 2, all in the same IZ.</p>
<p>Overall Economic Vulnerability Spectrum (Based on 15 indicators)</p>  <p>Less Vulnerable More Vulnerable</p> <p style="text-align: center;">78.9</p>	<p>Ward 2 is ranked 5th in terms of economic vulnerability in Aberdeenshire, however, there are some differences across the Ward. The average median income in Macduff is £26,474 (among lowest 20% in Aberdeenshire) rising to £31,823 (among lowest 30%) in Gardenstown and King Edward. The unemployment rate has risen by 2% to 4.2% above the Aberdeenshire average (3.62).</p>
<p>Overall Other Socio-Economic Vulnerability Spectrum (Based on 30 indicators)</p>  <p>Less Vulnerable More Vulnerable</p> <p style="text-align: center;">100</p> <p>100 = Most Vulnerable MMW in Aberdeenshire</p>	<p>Ward 2 is ranked the most vulnerable in socio-economic terms. As seen on page 7, the average drive time in Ward 2 is towards the more vulnerable end of the scale due in part to the rural nature of the area. Drive time by public transport and the bus accessibility score is better than Ward 1 and may explain why there is a high proportion of households without access to a car or van (27%). The digital vulnerability is ranked high however only 4.8% of premises in the Ward have no access to superfast broadband.</p>

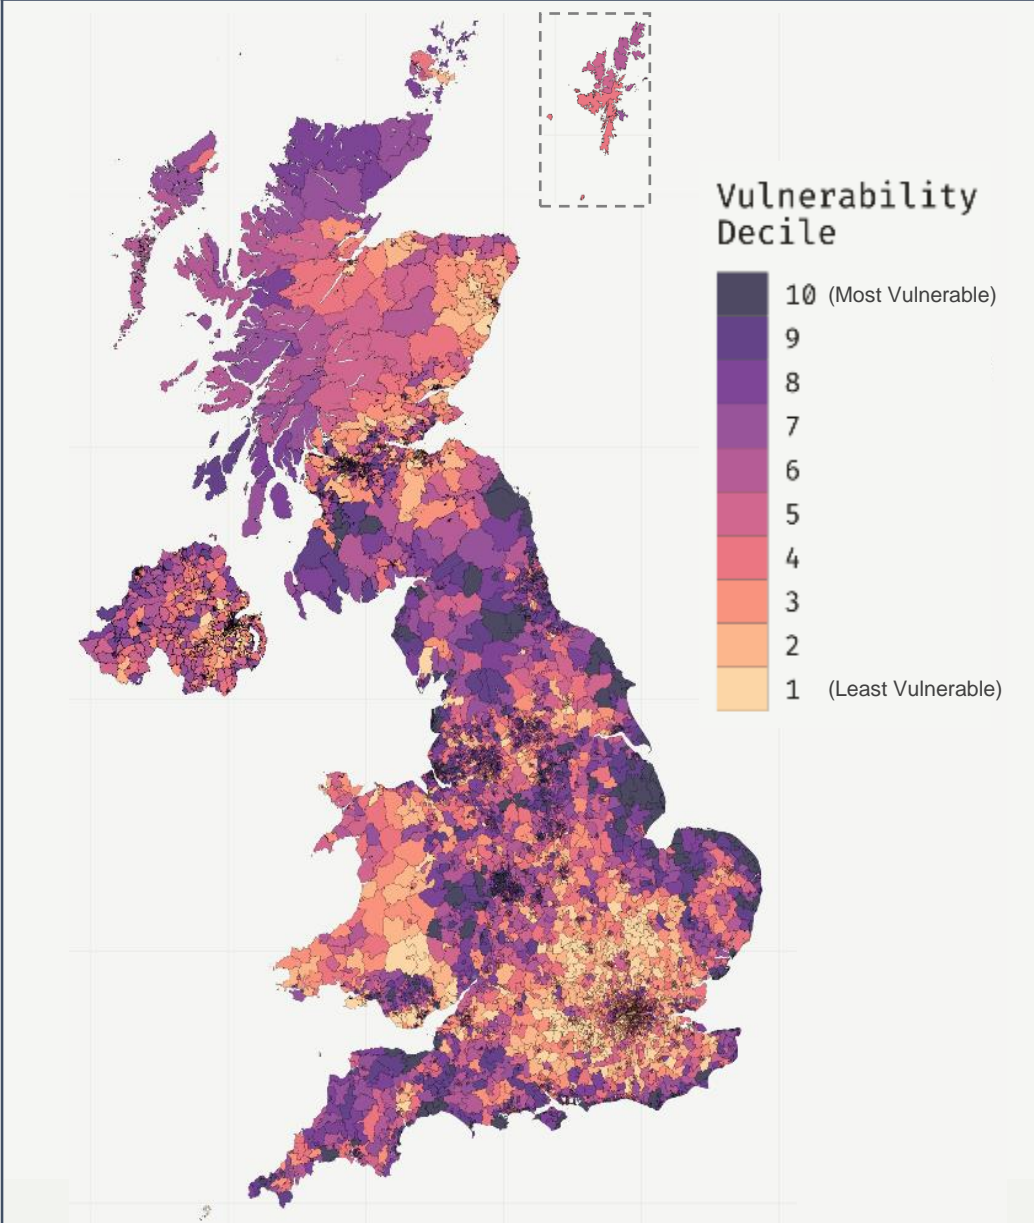

COVID Vulnerability Indices - Two Major Studies

Multi-Member Ward Overall COVID Vulnerability Spectrum

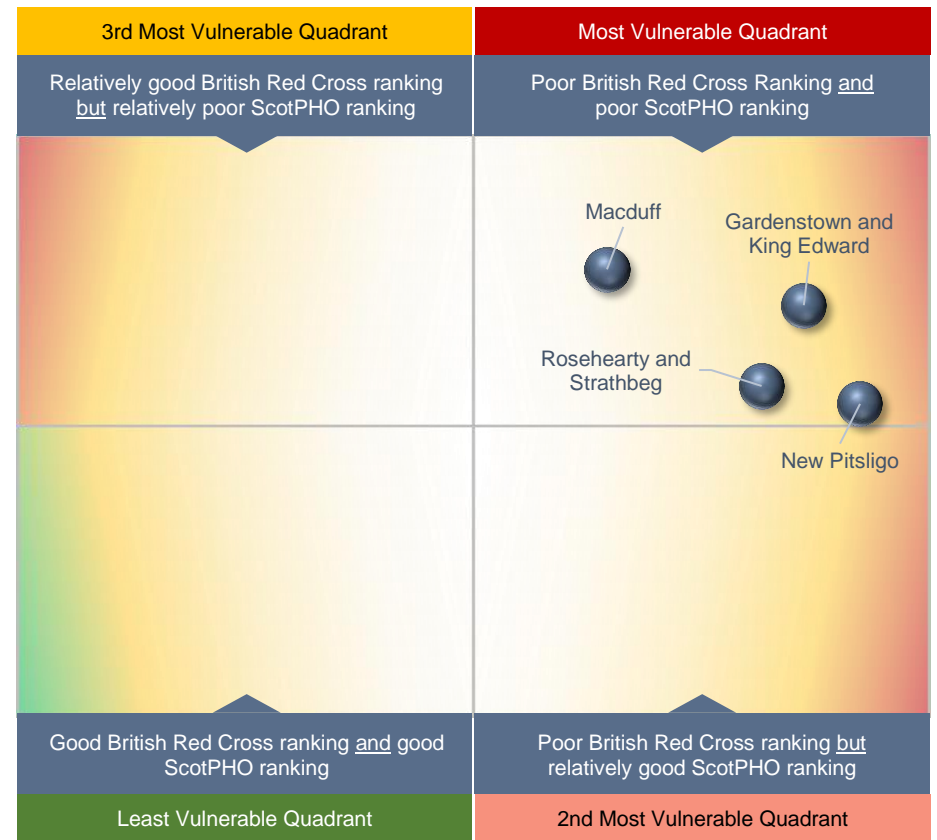

100 = Most Vulnerable MMW in Aberdeenshire

COVID Vulnerability Rankings - Aberdeenshire Intermediate Zones in a UK Context

COVID-19 Vulnerability Indices - British Red Cross (Oxford Analytics) and ScotPHO

Summary

On the Covid Vulnerability spectrum all the IZs in this Ward are found in the most vulnerable quadrant. Gardenstown and King Edward is the most vulnerable IZ and Macduff the least vulnerable of the four IZs.

Troup is the second most vulnerable Ward in Aberdeenshire.

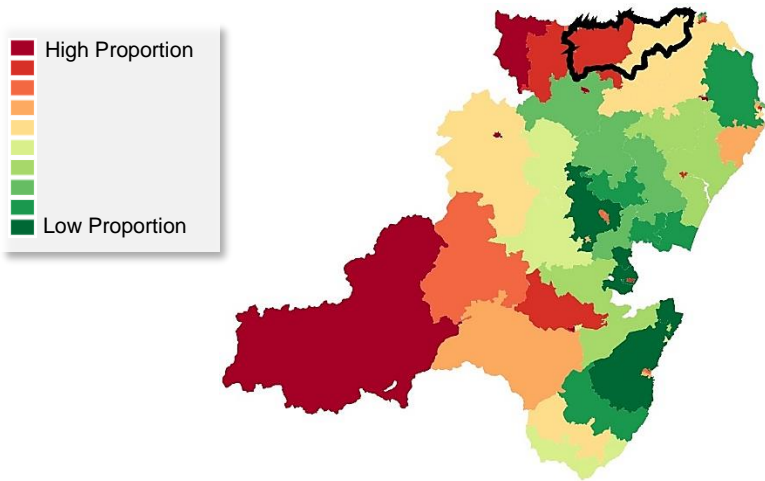

Demographics & Age-Related Vulnerability

Multi-Member Ward Age Vulnerability Spectrum

Map of Multi-Member Ward Intermediate Zones – 65+ population, 2018

Age Vulnerability / Underlying Health Condition per Intermediate Zone (65+ Age Group)

Percentage of population per age group, Aberdeenshire and MMW, 2018

Summary

Some of the Intermediate Zones within this Ward are among the most vulnerable in Aberdeenshire, according to the age vulnerability indicators. Rosehearty and Strathbeg is the least vulnerable and Gardenstown and Strathbeg the most vulnerable.

Gardenstown and King Edward has a higher than average % residents aged 65+ (24%). Along with Macduff it also has a higher than average % of 65+ pop relative to AA Cases with Entitlement. Across the Council area rates vary from 3.2% to 13.5%.

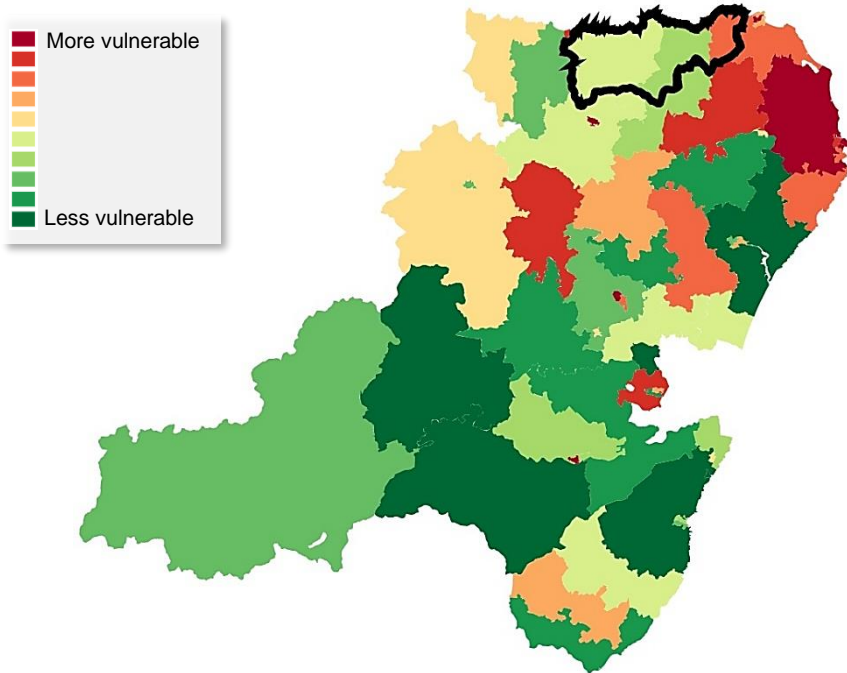

General Health / COVID Proxy Health Indicators

Multi-Member Ward Health Vulnerability Spectrum

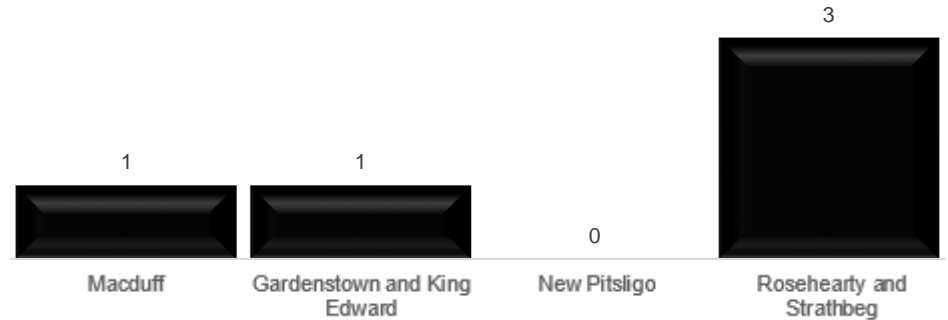

100 = Most Vulnerable MMW in Aberdeenshire

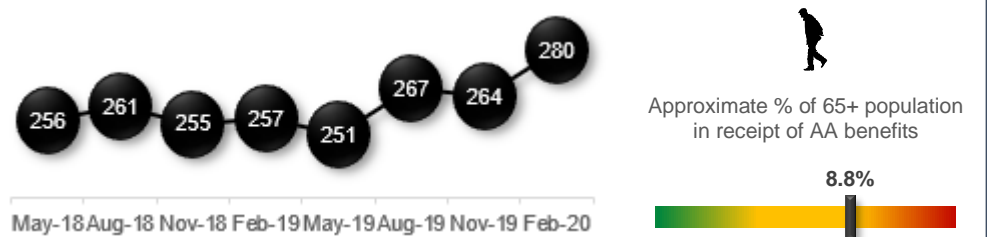

Map of Multi-Member Ward Intermediate Zones – Overall Health Ranking

Cumulative COVID-19 Deaths (1st March 2020 to 31st July 2020)

Attendance Allowance: Cases with Entitlement (Aged 65+ with Underlying Health Condition)

Summary

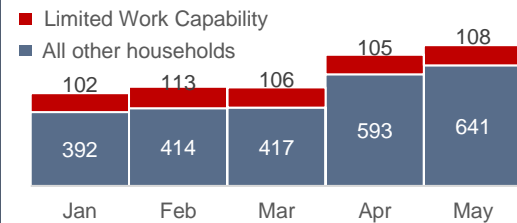

Most health-related indicators suggest the general population within the Ward is relatively healthy. The proportion of the 65+ population receiving Attendance Allowance benefits is 8.8% - just above the average for Aberdeenshire (8%) but at an IZ level Rosehearty and Strathbeg is relatively low at 6.8%. The proportion of the working age population receiving Personal Independence Payments is 2.6% - among the lowest rates in Aberdeenshire.

Approximately 108 households in the area receive Universal Credit (UC) based on Limited Work Capability (due to physical or mental health issues). This equates to 14.4% of total households that receive UC Payments, well above the Aberdeenshire average of 8%. UC and PIP claims are all high in the three Wards in the Banff and Buchan Area.

Troup has recorded 5 COVID-related deaths so far and is the reason that the Ward scores highly in relation to the Health theme relative to most other themes in this report and reports Rosehearty and Strathbeg as the most vulnerable IZ in terms of health.

Pension Credit Benefits - Proxy Indicator for 'Pensioner Poverty' (February 2020)

Percentage of People Income Deprived per MMW Intermediate Zone (SIMD 2020)

Summary

In economic terms, this Ward is the 7th most vulnerable in Aberdeenshire. Median household income is the 3rd lowest in Aberdeenshire (£29,740). The proportion of households earning less than £20,000 is at the lower end of the scale at 17%. The area is home to a high unemployment rate (4.2%), income deprivation rate (9.3%), and the 2nd highest child poverty rate in Aberdeenshire (17.4%). Pensioner poverty, as determined by the proportion of people aged 65+ in receipt of Pension Credits, is also the 5th highest in Aberdeenshire.

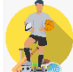

This is to some extent reflected in the indicators on the next page. Average drive time to amenities is above average and % of addresses with private outdoor space is towards the lower end at 89.3%. Food vulnerability, digital vulnerability and the longest distance to a food bank is an issue. Loneliness arises when a person's required level of social interaction is not met. The 'Loneliness Prescription Index is above the average in part due to the rate at IZ level for Gardenstown and King Edward (36.3%) which is twice the rate of Rosehearty and Strathbeg (15.4%).

Other Socio-Economic Data

Multi-Member Ward Other Socio-Economic Vulnerability Spectrum

100 = Most Vulnerable MMW in Aberdeenshire
