Notes on the Maps

The map on the left shows the location and the geographic area of the Peterhead Links Intermediate Zone which contains six Data Zones. The IZ lies within Ward 6 - Peterhead South.

Spectrum Charts Explained

The following statistical pages frequently utilise spectrum charts as a visual aid to accompany an indicator. They are used to place the relevant Intermediate Zone (IZ) in the context of all other IZs in Aberdeenshire with regards to that indicator.

The charts to the right are examples of the spectrum charts used in this report. The black line represents where the IZ sits in the context of the highest and lowest figures in Aberdeenshire. If the black line is situated towards the left-hand side, the IZ recorded one of the lowest figures in Aberdeenshire. Conversely, if the black line is towards the right-hand side, it recorded one of the highest figures in Aberdeenshire.

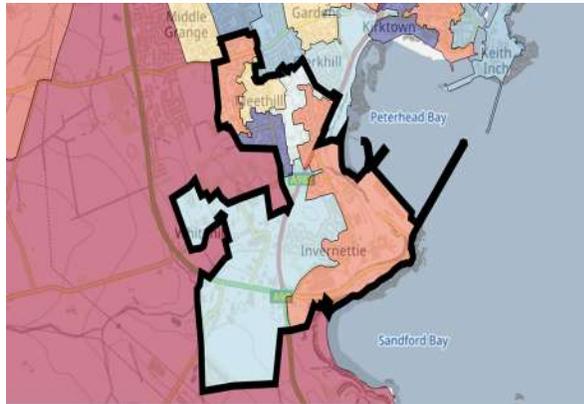

The green/red spectrum charts are the most common type. If the black line is situated towards the red end of the spectrum, it means the figure is objectively worse than most other IZs in Aberdeenshire and *vice versa*.

The blue/red spectrum charts are used in the demographic section to denote high population growth (red) and population decline (blue).

The grey spectrum charts are simply used to denote high and low in the context of Aberdeenshire, where the high / low figure is neither good nor bad. An example would be the proportion of dwellings that fall within Council Tax Bands F-G.

Peterhead Links Demographic Data

Map of Peterhead Links: Population Change (2014-2021)

Low Growth / Depopulation High Growth

The population of the Peterhead Links IZ decreased by 3.2% between 2014 and 2021. This is mainly down to the population shifts in DZ S01007076 where there was a decrease of 97 (12.8%) and DZ S01007072 where there was a decrease of 34 (5.4%).

Compared to 2014 Peterhead Links has seen significant increases in the older age groups especially with the 70+ age range with a 38.2% increase with 70–79-year-olds.

At 63.1%, the proportion of Working Age people in the IZ is above the average when looking at the spectrum in an Aberdeenshire context.

At 17.0%, there is a lesser proportion of children in the IZ is than in most other areas across Aberdeenshire.

At 19.9% the number of older residents in the IZ is lower than most other areas of Aberdeenshire even with the spikes in population change among the 70+ age range.

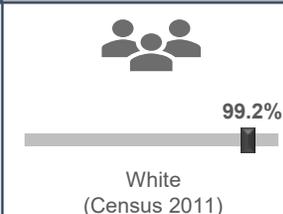

Population Change per Data Zone, 2014 & 2021

Population per Age Group, Peterhead Links, 2014-2021

Rate of Population Change per Age Group, 2021 Compared to 2014

Population per Broad Age Group, 2021

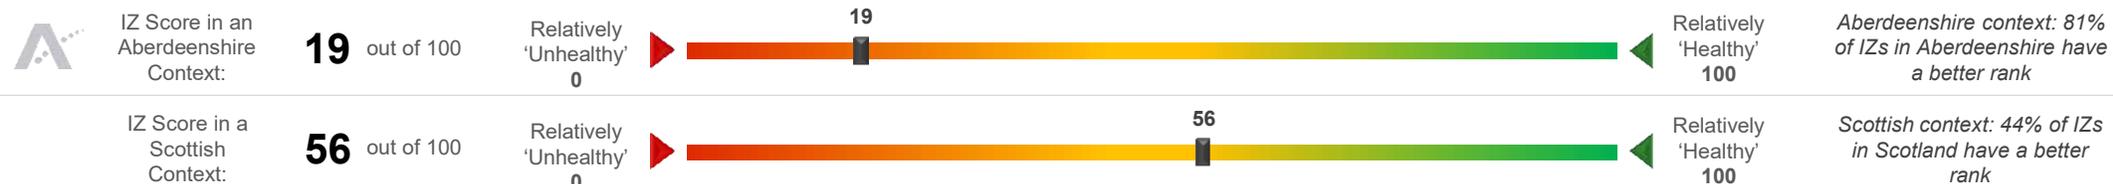

In 2021 4,359 people lived in Peterhead Links -- 739 (17%) were under 15 years of age, 2,751 (63.1%) were aged 16-64, and 869 (19.9%) were over 65.

The black markers show where these percentages sit in the context of Aberdeenshire: left = low; right = high.

SIMD 2020 Health Domain Rank		Universal Credit (UC) Limited Work Capability Households	Personal Independence Payments				
		<p>No. of Households in receipt of Universal Credit</p> <p>% of Households where at least 1 occupant has limited work capability (May-2023) - Aberdeenshire Context</p> <p style="text-align: center;">4.2%</p>	<p>No. of Cases with Entitlement</p> <p>% of Working Age Population (16-64) Receiving PIPs (Jul-2023) - Aberdeenshire Context</p> <p style="text-align: right;">5.9%</p>				
<p>Day-to-Day Activities</p> <p>Proportion of people whose day-to-day activities are limited a little or a lot - Aberdeenshire Context (Census 2011)</p> <p style="text-align: center;">16.0%</p>	<p>Health Rating</p> <p>Proportion of people who rated their health as either 'good' or 'very good' - Aberdeenshire Context (Census 2011)</p> <p style="text-align: center;">84.8%</p>	<p>According to monthly health-related benefits data, the number of households on Universal Credit has decreased since the summer 2022 peak, generally contradicting the Aberdeenshire trend, which has been on a steady upwards trajectory since late 2021. The number of households with Limited Work Capability or LWC (due to physical or mental health issues) has remained relatively steady throughout the period, now affecting 77 households, which is similar to the number seen over the summer peak. However, the IZ figure of 4.2% of households with at least 1 occupant assessed as having LWC is towards the higher end of the Shire spectrum.</p> <p>A higher proportion of the Working Age Population (5.9%) receive Personal Independence Payments (PIPs). This helps with some of the extra costs caused by long-term disability, ill-health or terminal ill-health. The IZ trend has likewise decreased since the 2022 peak.</p>

Premature births	10.5	1.2%		2.3%	Down	% of all live births
Uptake of the HPV vaccine in S3 girls	89.1	-0.3%		4.3%	Down	% of S3 girls

Based on the 24 health-related indicators in the table, this IZ is situated at the more vulnerable end of the spectrum (19) in an Aberdeenshire context. The IZ fares slightly better when all IZs in Scotland are taken into consideration as it is in the top half nationally (56).

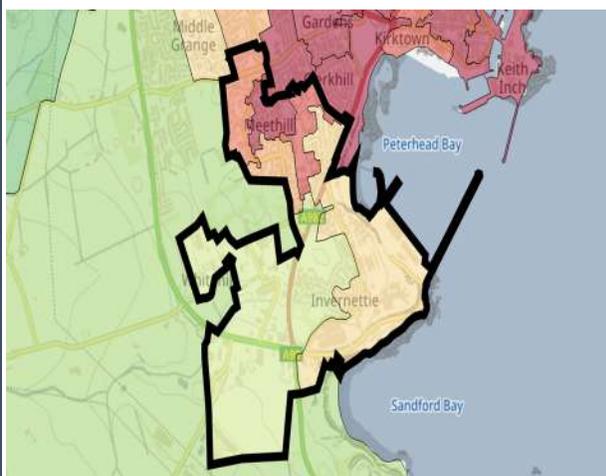

The area compares favourably to most other areas in Scotland in terms of Developmental concerns at 27-30 months and Child dental health in Primary 7.

- Issues that may require further investigation include:
- Maternal obesity
 - Male life expectancy
 - Immunisation uptake at 24 months – 5 in 1

With regards to each of the indicators listed above the IZ compares less favourably to other areas in Aberdeenshire and, in some instances, Scotland (and/or the trend is worsening).

Peterhead Links Economic Data (1 of 3)

Rank of Household Income per Data Zone (2023)

In terms of household income, this IZ is among the poorest in Aberdeenshire. The median household income in 2023 equated to £34,804 which is £6,952 lower than the Shire average (£41,756).

Median household income ranges from £26,536 in DZ S01007075 to £46,188 in DZ S01007072.

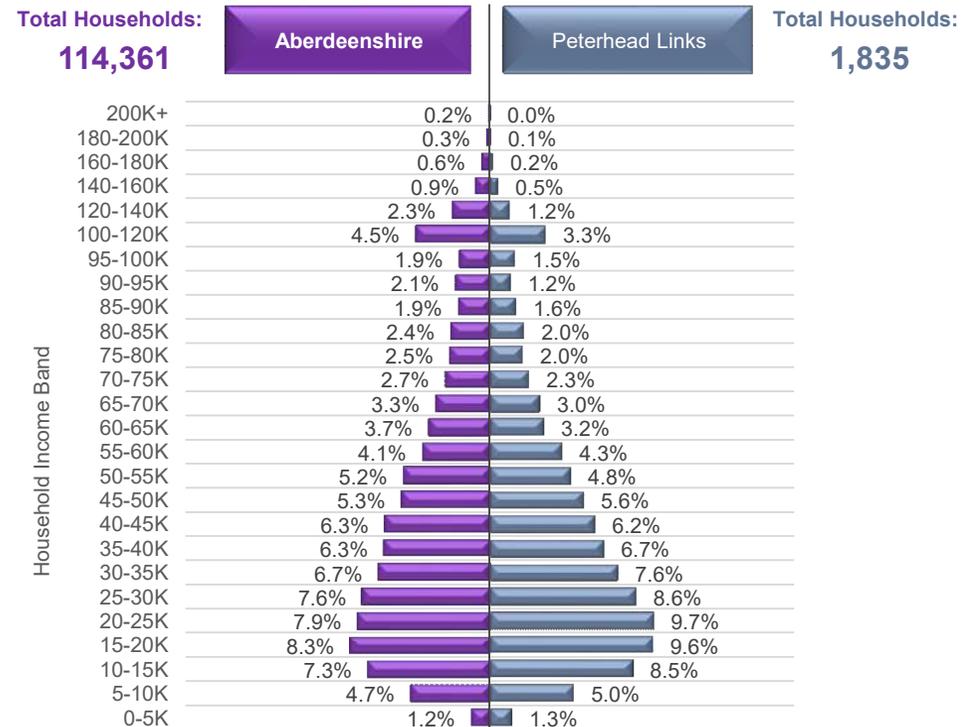

Approximately 6.3% of households in this IZ earn less than £10,000 per year, which is higher-than-average (5.3%). This equates to roughly 116 households.

In addition, Approximately 5.3% of households in this IZ earn more than £100,000 per year, which is lower than average (10.1%). This equates to roughly 97 households.

Household Income per Data Zone (2023)

Peterhead Links Economic Data (2 of 3)

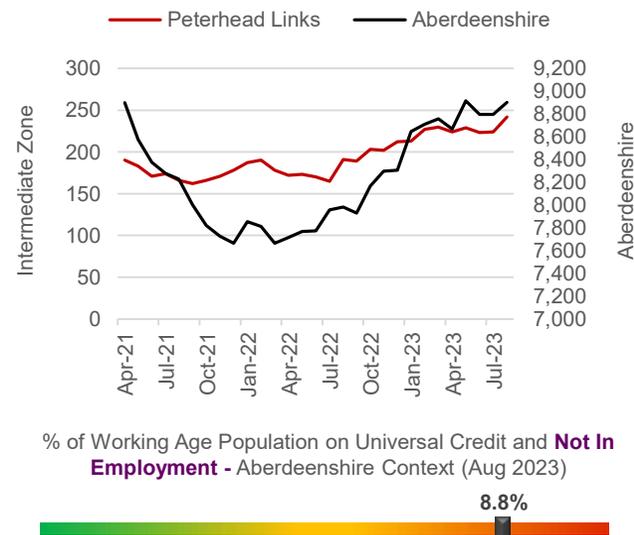

Latest Unemployment Rate - Ranking per Data Zone

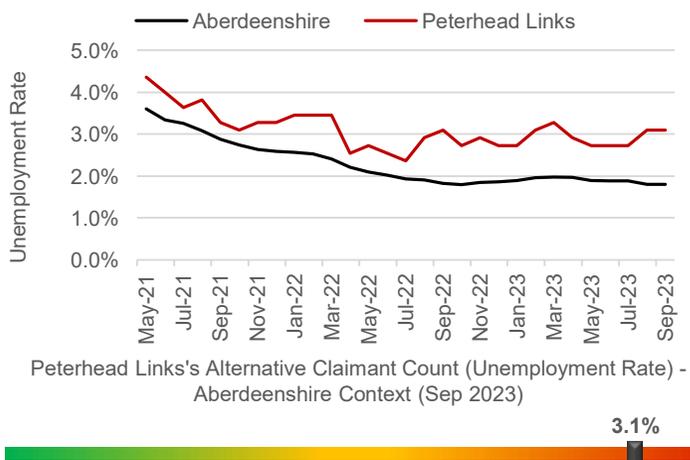

People on Universal Credit - In Employment

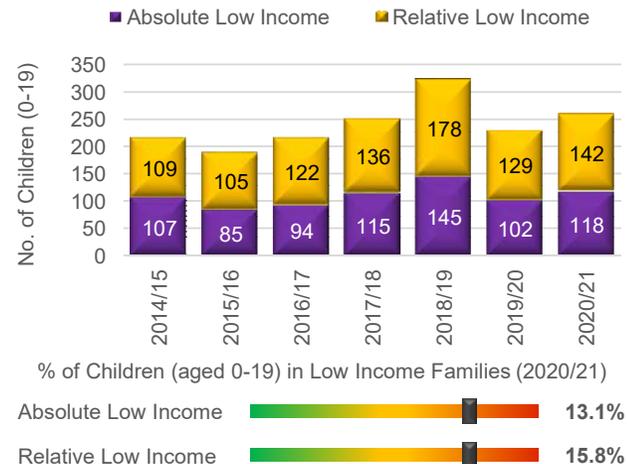

People on Universal Credit - Not In Employment

Alternative Claimant Count - Effective 'Unemployment Rate'

Children in Low Income Families

Summary

The number of people claiming Universal Credit (UC) - who are also in employment - has remained relatively steady over the last few months, contrary to the Shire-wide trend, which has increased. Latest figures show 6.2% of people aged 16-64 (who also have jobs) are claiming UC. This is towards the top end of the spectrum in a Shire context. A similar picture emerges in relation to people on UC and not in employment.

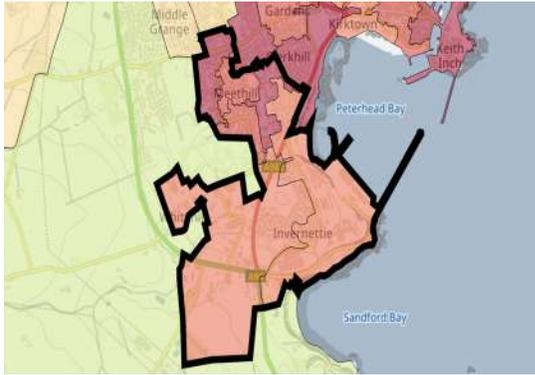

Like Aberdeenshire, the unemployment rate in the IZ has fallen since the September 2020 peak of 3.8%. Latest data suggests approximately 3.1% of the Working Age population is currently out-of-work, which is significantly higher than the Aberdeenshire rate (1.8%).

Children living in low-income families are relatively uncommon. However, recent increases suggest the issue may be coming more to the fore over recent years, particularly since 2020/21.

People With No Qualifications, Census 2011

% of Employees per Qualification Type

Summary

The employment numbers per broad industrial group relate to the kind of jobs within the area, which may be filled by those living outwith the IZ.

Major industries in terms of jobs in the area include the Manufacturing sector, the Transport sector, Public Administration and the Business Administration sector.

There has been a large growth in Agriculture and Manufacturing sector. Jobs in this latter industry have doubled since 2020.

The growth in these type of jobs, has meant a 4% increase in jobs across the IZ between 2020 and 2022, suggesting a decent degree of resilience post-Covid.

The area also appears to have attracted a greater number of enterprises over the most recent year (i.e. companies with sales between £200k - £499k).

Housing Indicators

Peterhead Links Housing Data

Relatively sparse / rural

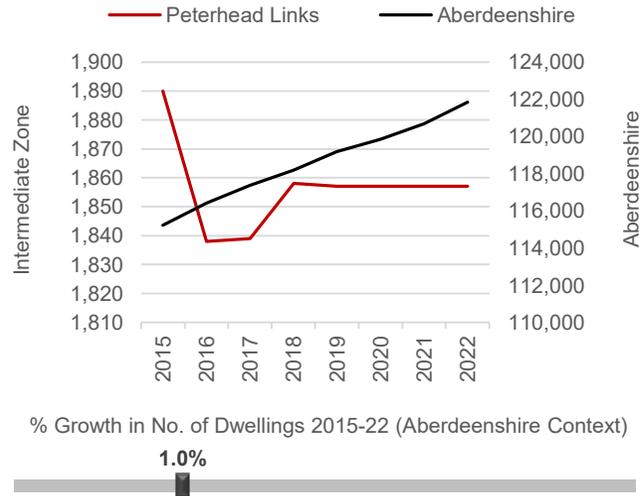

Dwellings per Hectare (2022)

6.66

Relatively dense / urban

Number of Dwellings, 2015-22

Summary

At 6.66 dwellings per hectare, this IZ is in the higher range of the spectrum between the rural and urban extremes.

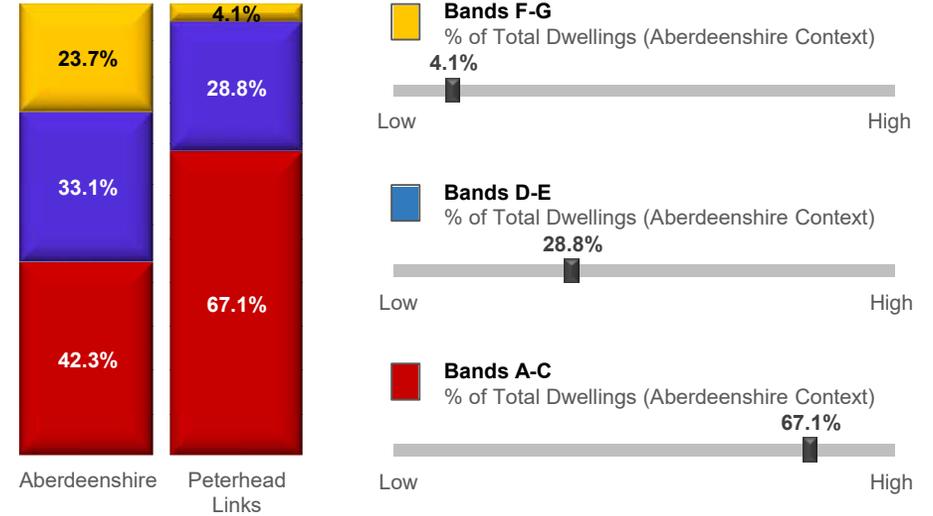

The number of dwellings in the IZ has increased by 1.0% since 2015, which is towards the higher end of the spectrum in an Aberdeenshire context.

House building in the area has been on steady increase since 2015 – 2018 and has since plateaued.

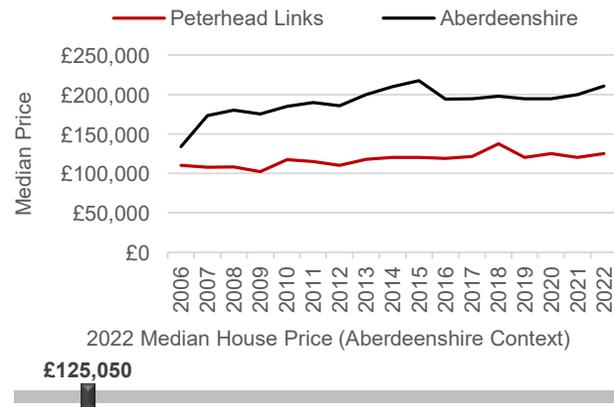

A relatively large proportion of the dwellings in this IZ (67.1%) fall within Council Tax Bands A-C. This puts the IZ towards the higher end of the spectrum. Relatively few properties fall within Bands F-G (4.1%).

The median house price is £125,050 which is significantly lower £85,945 lower than the Aberdeenshire average (£210,995).

Peterhead Links Other Socio-Economic Data

Geographic Access / Digital Connectivity / Food Vulnerability / Loneliness Proxy

Housing / Environment / Crime Rate / Educational Attainment

Summary

According to the miscellaneous socio-economic indicators on this page, this the IZ appears to be well served in terms of households with low average drive times to local amenities by car or bus as well as a high bus accessibility score. This is reflected in the large % (18%) of households without access to a car or a van.

There is a high % of homes with private outdoor space (99.6%) and the average distance to the local park, garden or public playing field is just over 624m. There is a higher than average % of 16+ population in receipt of Housing Benefit and single person discounts. Overcrowding is also higher at 6.4%.
