

'Autumn' fisheries negotiations

Colin Faulkner, DEFRA

North-East Atlantic Fisheries Commission (NEAFC)

A complex web of inter-related negotiations

- UK-EU bilateral: TACs & management measures on stocks shared between the UK and the EU
- UK-Norway bilateral: access to each other's waters; quota exchanges; cooperation
- UK-Faroes bilateral: access to each other's waters; quota exchanges; cooperation
- UK-EU-Norway trilateral: TACs for jointly managed stocks (e.g. NS cod) & associated management measures
- Coastal State negotiations on widely distributed stocks: TACs for mackerel, ASH, blue whiting, redfish
- Regional Fisheries Management Organisations: NEAFC, ICCAT, IOTC, NAFO

Long-term challenges

- Building a new set of relationships across the North-East Atlantic
- Quota shares for the pelagic stocks
- North Sea whitefish / mixed fisheries
- Government/industry/science engagement

Autumn 2021 key issues

- UK-EU-Norway trilateral: North Sea herring; North Sea whitefish scientific advice
- Pelagic stocks: TACs agreed, but elephants in the room remain
- UK-Norway & UK-Faroes bilaterals: access to each other's waters
