

Stonehaven Flood Protection Scheme

Application Update 20/04/2016

Following the Infrastructure Services Committee on the 28/01/2016 and in accordance with Schedule 2 paragraph 5(3) all objectors were notified of the Councils preliminary decision to b) confirm the scheme with modifications. Subsequently, three objectors have removed their objection to the scheme.

These include:

- Objection no 5 Mr Craig
- Objection no 2 Mr and Mrs Allan

Wall Mitigation

The wall height has not changed from that previously advertised in Flood Risk Management Act Application drawings.

However for a 75m stretch at the eastern end of Carron Terrace, the top 600mm will be of a glass / see through type of material.

- Objection no 8 Mr & Mrs Gorrara

Green Bridge Mitigation

To mitigate the objection we have proposed to relocate the bridge some 20m upstream from the advertised location.
